

Technical Bulletin WB0601 Date Code Information for RoHS Compliant Products

To determine if your Product is RoHS Compliant, please follow step one or the following:

- 1) Does the package have the RoHS “check mark” on the box? If yes, the product is RoHS compliant. See below for package marking examples.
- 2) Determine the production dates of the part by using the “Q-Number” located on the packaging. See the examples below.

Example: **XX-XXXXXXXX-051018-XX**

(yymmdd) format

Product produced on Oct. 18th 2005 in this example.

- 3) Search the listing of parts with a compliance status at www.weidmuller.com for date of manufacture to determine if the product in question is manufactured as RoHS compliant. The dates shown in this table are **MANUFACTURE** dates and stock on shelves in the distribution channel will have to be identified by the package markings shown here.

Figure 1. Package Markings for PCB products
In this example: Manufactured on Sept 7, 2005

Figure 2, Other package markings

If there are any questions regarding RoHS compliance of a product, please call our Technical Support Team at (800) 849-9343 or e-mail us at support@weidmuller.com
